

The **multi-band ligator** that's simple, fast, reliable and ready to use.

 **Haemoband**
SURGICAL

Marketed in India by :

MedTech Devices

Having been designed by surgeons for surgeons, the Haemoband makes ligation procedures more comfortable for patients, more clinically efficient for surgeons and easier for nurses.

Pre-loaded with
4 rubber bands.
The deep nozzle
offers optimum suction
pressure for more
accurate banding

Designed for use
with an ordinary
proctoscope

Slim
120mm
insertion
probe

Haemoband

Innovative
multi-action
handle controls
suction, fires
and reloads
bands

A better, more clinically efficient ligator for Patients, Nurses and Surgeons

Clinically more efficient

Haemoband is very clinically efficient. Its multi-action handle means you only need one hand to control suction and release and reload bands. This leaves your other hand free to hold a proctoscope and means you can work alone. The design of Haemoband also allows for much more accurate applications, reducing the need for additional procedures.

Easier and faster

Because the gun is pre-loaded, already clean and can be used single-handed, the time taken for a typical ligation procedure can be reduced from 20 minutes to between 2 and 4 minutes for the banding of up to 3 haemorrhoids. This not only improves patient comfort considerably, but its disposability negates the risk of cross-contamination.

Ready to use

The Haemoband gun is ready to use straight from the airtight, clean bag. There are no spare parts to lose, find or fit and the only extra equipment you need is a proctoscope and standard hospital suction.

Cost effective

The Haemoband is one of the most cost effective multi-ligators on the market. Its disposability means that there is no need for sterilisation equipment and no need to invest in costly permanent tools.

After firing, the gun automatically reloads another band ready to fire again

Easily attach suction to the Haemoband
